This process included the development of a series of integrated courses designed to transform traditional Master's in Public Health courses (Health Policy and Management, Environmental and Occupational Health, Biostatistics, Epidemiology and Social and Behavioral Sciences) into an integrated, multidisciplinary, practice-based core curriculum designed to foster 21st Century Public Health values and curriculum
- Led the development of a series of courses including Global Food Security and Non-Communicable Disease courses
- Assisted in the development and conversion of two on-line certificate programs: (1) the Certificate in Disaster Management and (2) the Certificate in Humanitarian Assistance, Introduced to the College of Public Health Fall of 2005-Spring 2007
- Created an on-line class for the Florida Department of Health: *Public Health: Core Functions and Essential Services*
