OTHER CREATIVE WORK

Balada-Llasat, J.M., Bersani, A., Stevenson, K.B., Wang, S.H., **Kue, J.**, Yimer, G., & Gebreyes, W.A. (2019). Contributor to the AMR Clinical Specimen Collection Training-of-Trainers Package for Ethiopia Healthcare Personnel. This clinical specimen collection training package includes a Trainers Manual, Reference Manual, Step-by-Step Instructions, and PowerPoint Presentations for different types of specimen collection (blood, urine, stool, respiratory, and wound). I developed the assessments and clinical checklists for each module. I also provided training and evaluation during the implementation of this package. The training package is intended as a general guidance and education to clinicians, laboratory personnel, and others involved in the collection of clinical specimens. The project was supported by Cooperative Agreement Number GH001752, funded by the Centers for Disease Control and Prevention. Open-source training materials are available online: <https://www.canvas.net/browse/osu/global-one-health>

Kue, J. (2013). Developer of "Culturally Sensitive Human Subjects Training" manual. I developed a culturally sensitive human subjects' protection training tailored to research staff with low English proficiency and limited and/or no experience with research. I adapted materials from CITI training and other research ethics trainings, received IRB approval, and implemented the training with research staff on my NCI-funded study (1R03CA175464-01A1).
