RESEARCH PROJECTS:

Jejunal Nutritional Feeding Support for Palliation of Unresectable Esophageal Cancer 1981 \$ 10,000,
Principle Investigator

Compassionate Use of Domperidone for Gastroparesis, 1986-2000, unfunded, only pharmaceutical
provided by manufacturer, PI

Alcohol Injection of Hepatic Tumors, 1988-1998 unfunded, PI

Katherine Chinnici Fund for Nutrition Education & Research, \$ 2,500, 1989. PI

Glaxo Gastric Ulcer Protocol 444 - \$24,000, 1989. PI

Glaxo Gastric Ulcer Protocol 445 - \$48,000, 1989. PI

Enteral alimentation vs. parenteral alimentation inpatients undergoing pelvic exenteration, 1990, unfunded PI

A Phase III intergroup trial: a prospective randomized comparison of continued modality therapy for carcinoma of the esophagus. Chemotherapy plus surgery vs surgery alone for patients with local regional disease. RTOG 89-11, ECOG 3250, intergroup 0113 – 1995, Co-Investigator

Peritoneovenous shunting vs. TIPPS in the treatment of massive ascites in patients with cirrhosis, CI

Use of Keterolac as endoscopic premedication. J Mamel, Seth Steinberg, unfunded PI

Postoperative evaluation of 5-FU by bolus injection vs. 5-FU by prolonged venous infusion prior to and following combined prolonged venous infusion plus pelvic XRT vs. Bolus 5-FU plus leucovorin plus levamisole prior to and following combined pelvic XRT plus bolus 5-FU plus leucovorin in patients with rectal cancer, Phase III. RTOG 94-03. 1994, CI

Short chain fatty acid enemas for the treatment of chronic radiation proctitis. Sponsored by Colomed, \$36,000. PI

A study to evaluate the diagnostic sensitivity and specificity of optical biopsy to differentiate scarred and malignant tissue in the colon in comparison to pinch biopsy. Sponsored by Optical Biopsy Systems. \$100,000 equipment optical spectroscopy. 1995, PI

Gastroesophageal Reflux in Eosinophilic Rhinitis. Unfunded, PI

A prospective randomized phase III trial comparing trimodality therapy (Cisplatin, 5-FU, radiotherapy, and surgery) to surgery alone for esophageal cancer. CI

A Phase II trial of external irradiation (50.4 Gy) & weekly paclitaxel (Taxol) for non-metastatic, unresectable pancreatic cancer RTOG 98-12, 1995, CI

A Phase III study of pre and post chemoradiation 5-FU vs. Pre & post chemoradiation gemcitabine for postoperative adjuvant treatment of resected pancreatic adenocarcinoma RTOG 97-04, 1996, CI

A Phase III randomized study of 5-FU, mitomycin-C and radiotherapy vs. 5-FU, cisplatin & radiotherapy in carcinoma of the anal canal RTOG 98-11 1998, CI

Randomized Trial of Pneumatic dilation vs Heller myotomy for treatment of achalasia 2004-present

CNTO 148 UC Program for mild to moderate CUC- Centecor 2008

Randomized double-blind efficacy, tolerability of Carbidopa intestinal gel- Solvay S 187.3.001, 2008
