CURRENT APPOINTMENTS:

President, University of South Florida Tampa General Physicians (USFTGP), Executive Vice President, Tampa General Hospital.
April 2022 – Present
I lead the managed service organization that provides the practice infrastructure for the employed physicians in our academic health system. We support >1,100 clinicians, employ ~1,800 staff, and support >$500 million in professional revenues. In this role, I report directly to the CEO of the health system and the Dean of the College of Medicine. I also serve as an EVP for the TGH/USF academic health system, and am a member of the system CEO cabinet.

Chairman, Department of Internal Medicine, MCOM
August 2024 – Present
After a national search did not yield the results desired, or meet the high expectations of the Dean of the MCOM, I was appointed by the Dean to assume the leadership of MCOM's largest department in 2024 after serving as the Vice-Dean for Clinical Affairs for the College. The Department of Internal Medicine has ~1,000 trainees, staff, providers, and faculty members, and a budget of >$150 million.

Professor, Department of Emergency Medicine, MCOM
July 2024 – Present
The Department of Emergency Medicine was elevated to full academic department status within the College of Medicine in 2024. Prior to that, it was a Division within the Department of Internal Medicine.

Professor, Department of Internal Medicine, MCOM
January 2017 – Present
Part-time clinical practice in the Emergency Department at TGH and USF Health's Monsour Executive Wellness program. I provide didactic and small group instruction to medical students on leadership, the business of medicine, and healthcare economics.

Professor (Courtesy), USF College of Public Health
February 2017 – Present

Associate Vice President, University of South Florida
September 2020 – Present

PREVIOUS APPOINTMENTS FOR THE UNIVERSITY OF SOUTH FLORIDA:

Chief Medical Officer, USF Health
January 2017 – November 2017
In this role, I oversaw clinical operations, professionalism, quality, safety, risk management, and patient experience for our large faculty practice plan, which is a designated service organization of the University of South Florida. This role, and my leadership portfolio, was later incorporated into my duties as Chief Clinical Officer for USF Health (see below).

Interim Chief Medical Officer
Center for Advanced Medical Learning and Simulation (CAMLS)
July 2017 – December 2018
I was asked by the Dean to assist in a significant leadership transition effort at CAMLS. I provided support for continuing professional development activities, helped develop new business relationships, and served on the search committee to find a new CEO of CAMLS.

Chief Clinical Officer, USF Health
December 2017 – March 2022
In my role as Chief Clinical Officer of USF Health, I oversaw and coordinated all aspects of clinical care, quality, operations, patient experience, and safety/risk across USF Health's clinical operations and health science colleges. This role combined the CMO position and that of the previous CEO of the USF Health practice plan. I led the day-to-day operations of our faculty practice plan as well as our direct service organization called University Medical Service Association, Inc. This is a large, academic, managed service organization and multi-specialty faculty practice of ~800 providers and 900 staff with a budget of ~$300 million. I served on the Dean's executive cabinet, and functioned as the primary physician involved with strategic hospital and ambulatory partnerships. I left this position to take on the role of President of USFTGP.

Associate Dean for Clinical Affairs, MCOM
January 2017 – September 2021
I helped to oversee the College of Medicine's clinical activity; reporting to Vice-Dean for Clinical Affairs and working collaboratively with clinical Department Chairs. I assisted with faculty recruitment, retention, and coordinate professionalism interventions with the office of faculty affairs and our partner hospital medical staff offices. I left this position when I was promoted to the Vice-Dean position in October 2021.

Interim Chief, Division of Cardiovascular Sciences
Department of Internal Medicine, MCOM
November 2018 – December 2019
The Dean tasked me to rebuild Cardiology inclusive of completing a Departmental review, recruiting additional faculty, and executing a successful national search for a new Division Chief. I achieved these goals within one calendar year.

Vice-Dean for Clinical Affairs, MCOM
October 2021 – August 2024
I oversaw the clinical mission of the College of Medicine reporting to the Dean. Direct reports include the Chief Medical Officer/Associate Dean for Clinical Affairs, CEO of CAMLS (simulation center)/Associate Dean. I left this role to become the Chair of the Department of Internal Medicine upon the Dean's request and appointment.

PREVIOUS LEADERSHIP APPOINTMENTS FOR THE OHIO STATE UNIVERSITY:

Medical Director, Emergency Department
The Ohio State University Wexner Medical Center (OSUWMC)
December 2007 - June 2013
In this role, I reported directly to the system Chief Medical Officer. I provided medical direction, quality, safety, and patient experience oversite for a large, 80K visit academic level one trauma center and clinical decision unit. I was the founding leader of the expanded observation medicine program in 2008. I helped to design, plan, and implement the new Abercrombie and Fitch Emergency Department that opened at OSU in 2014. I helped to lead the team that created only the second oncology specific Emergency Department in the United States, and the first integrated with that of a full-service Emergency Department.

Member, Board of Managers, OSU Emergency Medicine, LLC
July 2007 – December 2016
At-Large Member, OSU Physicians, Inc. Board of Managers
March 2010 – June 2012
Executive Committee Member, OSU Physicians, Inc. Board of Managers
October 2011 – June 2012
I served as a Board of Managers member of both our LLC board in Emergency Medicine as well as an elected member of the full board of OSU Physicians, Inc. and the board's executive committee.

Founder, Physician Advisor Program, OSUWMC
2011
I took the initiative to form an internal advisor group comprised of OSU COM faculty members to better officiate medical necessity determinations and second level physicians reviews for the entire OSUWMC. I trained the initial group of advisors in Milliman, InterQual, and medical necessity parlance and collaborated with system leadership in case management to create an internal advisor system. We significantly improved turn around time, case manager satisfaction, and provided a significantly improved linkage to medical staff members when questions arose regarding medical necessity.

Founder, After-Hours Clinics, OSUWMC
2012
I led the team that created and successfully implemented the unique ambulatory offering called the OSU After-Hours Clinic. Started in October of 2012, the initial clinic grew to see well over 15,000 patients annually and a second similar clinic opened in 2014 with similar volumes. This acute care, sub-specialty clinic was a unique blend of traditional urgent care and services traditionally only found in Emergency Departments. It led to greatly increased after-hours access to care that resulted in a 13% decrease in non-urgent ED visits at the University Hospital ED. Almost 60% of the patients accessing care at the AHC were not from within the OSU Health System. The Dean of the COM recognized me for this accomplishment by awarding me the 2013 OSU College of Medicine Innovation Excellence Award.

Assistant Chief Operating Officer, OSUWMC
September 2012 – December 2016
In this role, I reported directly to the system Chief Operating Officer and was responsible for managing system wide capacity management solutions, reorganizing and improving the system's transfer center and bed placement apparatus, implementing a ~$15 million IT patient flow management software solution, and creating a patient flow management center for the health system. I oversaw a Director, multiple managers, a staff of ~40 FTE's, and associated hospital cost center budgets of ~$10 million. I left this position for career advancement at USF Health.

Senior Triage Physician, Critical Event Officer, OSUWMC
July 2014 – December 2016
I served as one of four senior physicians within the Medical Center to take call 24/7/365 to provide critical incident command to the entire health system.

Medical Director, Case Management, Social Work, and Utilization Management, OSUWMC
January 2015 – December 2016
In this role, I reported directory to the system Chief Medical Officer and was responsible for the entirety of case management, social work, and utilization management for a 1,300 bed integrated academic health system. I helped to found the post-acute care network for OSUWMC. I oversaw a Director, multiple managers, a staff of ~155 FTE's, and associated hospital cost center budgets of ~ $50 million. I left this position for career advancement at USF Health.

PREVIOUS ACADEMIC APPOINTMENTS AT THE OHIO STATE UNIVERSITY:

Assistant Professor (2005-2011), Associate Professor (2011-2016)
Department of Emergency Medicine, OSU College of Medicine
July 2005 – December 2016
I served as a core educational faculty member for the Emergency Medicine residency-training program. I taught medical students and resident physicians while on clinical ED and CDU shifts. I also taught traditional lectures, hosted journal clubs, and was a mock oral board examiner.

Administrative Fellowship Program Director
Department of Emergency Medicine, OSU College of Medicine
July 2009 – June 2015
I was the co-founder of the OSU Emergency Medicine Administrative Fellowship in 2008. The fellowship program was at the time one of only 18 similar programs nationally in EM, and was the first program to require the completion of an advanced management degree for graduation.

Vice Chairman for Clinical Affairs
Department of Emergency Medicine, OSU College of Medicine
January 2013 – December 2016
I was responsible for the entirety of the clinical mission of our large academic Department of over 50 faculty, 20 APP's, and support staff working clinically in two Emergency Departments,

two Urgent Care Centers, a Hyperbaric Medicine Center, the Center for EMS, and large Clinical Decision Unit. Direct reports included Medical Directors from the respective sections.

SELECT / SIGNIFICANT COMMITTEE MEMBERSHIPS:

University of South Florida Tampa General Physician
Member, Board of Directors
2021 – 2022 (Resigned from Board to become President of USFTGP)

USF Morsani College of Medicine and USF Health

PODCASTS

1. **Mark G. Moseley, MD, MHA**, President of USF Tampa General Physicians and Executive Vice President at Tampa General Hospital, addresses the critical issue of staffing shortages and why prioritizing staffing is essential. He also emphasizes the importance of investing in technology, discussing how technological advancements can support and enhance the efforts of healthcare staff. Becker's Healthcare Podcast. [National Audience]. August 2024.

2. **Mark G. Moseley, MD, MHA**, President of USF Tampa General Physician, discusses critical challenges in healthcare, including the growing impact of cybersecurity breaches and the transformative potential of artificial intelligence. He highlights the importance of resilience planning, collaborative IT efforts, and ethical governance in leveraging AI for both administrative efficiency and patient care, ensuring innovation without unintended harm. This episode was recorded live at the Becker's National Healthcare 12th Annual CEO + CFO Roundtable. [National Audience]. November 2024.

3. **Mark G. Moseley, MD, MHA**, President of USF Tampa General Physicians at Tampa General Hospital, joined Becker's Healthcare Podcast to share how investing in culture, fostering resilience and strengthening relationships helps his team navigate uncertainty while delivering both safety-net care and high-end services across Florida. As part of the partnership between TGH and USF Health, USFTGP reflects the power of academic medicine to drive innovation and elevate patient care. [National Audience]. August 2025.

4. **Mark G. Moseley, MD, MHA**, President of USF Tampa General Physicians and Executive Vice President at Tampa General Hospital, discussed how the health system is using technology, including agentic AI, to improve patient access and care coordination. Becker's Healthcare Podcast. [National Audience]. December 2025.

5. **Mark G. Moseley, MD, MHA**, President of USF Tampa General Physicians and Executive Vice President at Tampa General Hospital was the inaugural guest on the new podcast, "Give it to Me Straight, Doc" entitled, "What's Wrong With Health Care in America?" This podcast seeks to demystify the U.S. health care system, empower consumers, and improve health care literacy. [National Audicence]. February 2026.

6. **Mark G. Moseley, MD, MHA**, President of USF Tampa General Physicians and Executive Vice President at Tampa General Hospital, discussed navigating healthcare disruption through strong culture,focused leadership and simplifying the patient experience. He shared how TGH is approaching growth, access to care, technology and the future of academic medicine. Becker's Healthcare Podcast. [National Audience]. August 2026.
