Year two colloquium. Problem Solving with Gastrointestinal Endoscopy. Oct-Dec 2010.

GRANTS AND CONTRACTS

Kentucky Tobacco & Health Research Institute: Study of gastrin and secretin response to cigarette smoking. (July 1976 - June 1978).

University of Kentucky General Research Support Grant: Study of the possible effects of dietary lectins against colon cancer. (July 1976 - June 1977).

Veterans' Administration, Merit Review: Dietary lectins, prevention of intestinal carcinoma. (February 1979 - October 1982).

Veterans' Administration, Merit Review: Co-Investigator. A radionuclide test for cystic duct patency. (1979 - 1980).

American Society for Gastrointestinal Endoscopy: Co-Investigator. Nd:YAG laser vaporization versus peroral dilation and/or esophageal prosthesis in the palliative management of obstructing esophageal squamous cell carcinoma. (1985 - 1987).

A randomized trial of Lexipafant (PAF inhibitor) in acute pancreatitis. Co-Investigator (1996-1998).

Isis 2302: Co-Investigator. Study of an ICAM-1 antisense drug in Crohn's disease. (1997 - 1998)

LRBA activity in inflammatory bowel disease. Pilot grant from UCB (2007-2008).

Role of enterococcus in IBD. Grant from Proctor and Gamble (\$10,000) (2009).

Current Research Protocols

ERCP Complications: A Prospective Quality Improvement Study with National Benchmarking. Principal Investigator

Closure of enterocutaneous fistulae with endoscopic clips. IRB approved. Principal Investigator.

Completed Studies

Capsule endoscopy for obscure gastrointestinal bleeding yields a high incidence of significant treatable lesions within reach of a standard upper endoscopy. IRB approved retrospective study. Status: completed and manuscript submitted. Role: Principal Investigator.

Capsule endoscopy learning curve. IRB approved prospective study. Status: Completed and manuscript submitted. Role: Principal investigator.

A phase 2/3, randomized, double-blind, placebo-controlled, multicenter study of visilizumab in subjects with intravenous steroid-refractory ulcerative colitis. Protein Design Labs, Inc, Fremont , CA (Protocol number 291-415). 2005-present. Co-Investigator.

A randomized, controlled trial of pneumatic dilation and laparoscopic myotomy in the treatment of achalasia. Status: IRB approved and ongoing. Role: Co-Principle Investigator.

Advanced Techniques in Transgastric Endoscopic Surgery. Status: Approved by the USF, Institutional Animal Care and Use Committee. Role: Co-Principle Investigator.

Lipopolysaccharide responsive beige like anchor gene in Crohn's disease. IRB approved prospective study. Status: . Completed: Principal Investigator.
