## **TEACHING**

### *The Ohio State University*

#### N8890: Post-Candidacy Seminar: Spring 2015

Examine professional issues facing the nurse scientist in academia, practice and research for the post-candidacy PhD student.

#### N8193: Behavioral Intervention Research Independent Study: Fall 2014

The complex issues underpinning the development of evidence-based interventions in behavioral science are analyzed, and an intervention is developed related to the student's dissertation topic. Methods to optimize the development, delivery, effect and evaluation of health interventions in clinical settings are analyzed. This course will focus on oncology research.

#### N8890: Post-Candidacy Seminar: Fall 2014

Examine professional issues facing the nurse scientist in academia, practice and research for the post-candidacy PhD student.

#### Global Health Independent Study: Summer 2014

This course provided students with specific research experiences related to global health in the context of social work and nursing. Outcomes included a systematic review manuscript.

#### N6240S: Community Health Clinical: Summer 2014

Conduct a public health needs assessment of the near East side of Columbus as a component of the community health course clinical experience.

### *Arizona State University*

#### NUR 364: Research Synthesis: Fall 2009

This course focuses on understanding the research process as evidenced through the critique of a research study. As part of the nursing research process, current nursing research literature is critically examined and analyzed for application to the profession of nursing. In addition, this course fulfills the upper division literacy and critical inquiry general studies requirement. 3 credit hours, Online RN-BSN course

#### MPH 530: Social & Behavioral Determinates of Health: Spring 2011

In this course we examine the major social variables that influence urban population health (e.g., poverty, social class, gender, race, ethnicity, family, community, work, behavioral risks, and environmental resources) as well as the major theories of health behavior, health behavior change, and socio-ecological models of health outcomes. The course aims to provide students with the knowledge and skills needed to understand individual, community, and organizational health behaviors and change processes, especially in cross-cultural settings. It provides students with a theoretical foundation for planning culturally responsive public health interventions/programs in the context of social ecological models of health behavior. 3 credit hours

T32: Training in Health Disparities Science Program Seminar Series: Fall 2011 and Spring 2012

Weekly 2-hour seminars for pre and postdoctoral fellows on state of the science in health disparities research. Non-credit course.

NUR602: State of the Science: Fall 2011

This course provides a theoretical and empirical foundation for advanced research and in-depth synthesis and critique of theory and research related to a focal area of research interest. 3 credit hours

*University of Illinois at Chicago*

NUSC 585: Advanced Research Seminar: To Boldly Go: Doing Research with Diverse Populations- Spring 2005

This course will focus on conducting intervention research with diverse groups that are traditionally underserved, including people grouped by gender, sexual orientation and ethnicity, children, and the elderly. Students will critically review strategies to recruit and retain diverse populations as well as develop research interventions, with an emphasis on cultural competency and health literacy. 3 credit hours

NUSC 595: Advanced Nursing Seminar: Conducting Integrative Literature Reviews – Fall 2006

This course aims to prepare the student to conduct reviews of the literature in selected areas of interest, critique multiple research/scholarly manuscripts with the purpose of examination of knowledge development relevant to the student's area of research interest, and write an integrative review for publication that analyzes specific areas of research/scholarship, explains the current state of knowledge, identifies current gaps in knowledge, and justifies proposed directions for future research. 1 credit hour.

NUSC 595: Advanced Nursing Practicum: Literature Synthesis – Spring 2007

This course will prepare students to conduct reviews of the research literature in selected areas of interest for a synthesis. Students will critique multiple research/scholarly manuscripts with the purposes of: examining knowledge development, analyzing specific areas of research/scholarship, explaining the current state of knowledge, identifying current gaps in knowledge, and justifying proposed directions for future research. This is a writing-intensive course with multiple assignments. One of the goals of the course is to help students fine-tune their writing skills. 3 credit hours.

NUSC 556: Developing Literature Reviews – Fall 2008

This course prepares doctoral students to conduct a literature search for published research on selected topics, critique multiple research/scholarly manuscripts with the purpose of examination of knowledge development relevant to the student's area of research interest and analyze specific areas of research/scholarship, explain the current state of knowledge, to identify current gaps in knowledge, and justify proposed directions for future research. 3 credit hours.

**Independent Study Courses:**

Qualitative Data Design and Analysis: Asako Katsumata, PhD student, Fall 2005

Readings in Health Behavior Change Theory: Janet Thorlton, PhD student, Fall 2006

BRIDGES program independent study: Charisse Davis, Masters in Nursing, Spring 2006

Preliminary Examination Study: Janet Thorlton, PhD student, Spring 2006

Quantitative Research Design: Asako Katsumata, PhD student, Spring 2006

Preliminary Exam. Hours: Janet Thorlton, PhD student, Fall 2006- Fall 2007

**Guest lectures**

Experimental Design, Fall 2004

Theory for Health Behavior Change, Spring 2005 and 2006  
 Community-Based Participatory Research, Fall 2005  
 Health Promotion Theory, Fall, 2005, Spring 2006

University of Utah

N7010-001: Domains of Knowledge: Examine the history of scientific inquiry knowledge development in nursing, critique and synthesize research to explain the current state of knowledge, to identify current gaps in knowledge, and justify proposed directions for future research.

N7010-002: Domains of Knowledge: Oncology Emphasis: Web-based course for the newly funded (NCI) online PhD in Oncology Nursing. Examine the history of scientific inquiry knowledge development in nursing, critique and synthesize research to explain the current state of knowledge, to identify current gaps in knowledge, and justify proposed directions for future research, all with an emphasis on oncology research.

N6000: Scholarly Inquiry: Acquiring knowledge and developing skills to engage in scholarly inquiry. These include being able to identify research problems, synthesize published research and evaluate research for use in clinical practice.

N4100-01: Nursing Research (Quantitative): This course is designed to develop the basic ability of the student as an informed consumer and participant in the process of nursing research. Students will collect, analyze, display, and interpret data to solve clinical problems and improve practice. Development of a sense of inquiry through understanding and applying the logical steps of the research process are emphasized.

N7961: Research with Diverse Populations: Research in cancer prevention and control in diverse groups, including gender and ethnically diverse groups, children, and the elderly will be examined. Students will analyze issues related to historical exclusion of particular populations from research including women, racial minorities, children, and the elderly. Strategies to recruit and retain members of these groups will be identified and evaluated. Students will also critically review published literature in cancer control with special/diverse population groups, as well as the principles of participatory research, cultural competence and health literacy. Regulatory and ethical concerns and gender and minority inclusion criteria in relation to proposal development will be discussed.

**Independent Study:**

Readings in Cancer Control Research and Health Behavior Change Theory: Julie Bauman, Preventive Oncology Fellowship, Spring 2002.

Masters Project: Laura Eisman, Masters in Nursing Informatics, Spring 2002.

Masters Project: Jon Wheeler, Masters - Acute Care Nurse Practitioner, Summer 2002.

Masters Project: Gretchen Ratzlaff, Masters - Acute Care Nurse Practitioner, Summer 2002.

Readings in Health Behavior Change Theory and Cardiovascular Disease Prevention: Nicole Paulson, Masters in Nursing, Nurse Practitioner, Spring 2002.

Undergraduate Research Opportunity Program Grant: Kathleen Rich, Senior, BSN, Spring 2002.
